

Installation of Coderunner plugin on Moodle Server

Assumption:

- You have a local instance of moodle server
- RKU local instance of moodle server is on *192.168.176.82*

Source to install Code Runner

- Click [here](#)

Installation of Code Runner Plugin in moodle

1. Connect to local server i.e. "192.168.176.82" (local IP address @RKU)
 - a. Command: **ssh root@192.168.176.82**
 - b. You will see the root of moodle server as shown in below screenshot

```
cabcin3@cabcin3 MINGW64 ~/Desktop
$ ssh root@192.168.176.82
root@192.168.176.82's password:
Welcome to Ubuntu 20.04.6 LTS (GNU/Linux 5.11.22-4-pve x86_64)

 * Documentation:  https://help.ubuntu.com
 * Management:    https://landscape.canonical.com
 * Support:       https://ubuntu.com/advantage

 * Introducing Expanded Security Maintenance for Applications.
   Receive updates to over 25,000 software packages with your
   Ubuntu Pro subscription. Free for personal use.

   https://ubuntu.com/pro
New release '22.04.3 LTS' available.
Run 'do-release-upgrade' to upgrade to it.

Last login: Tue Aug 22 04:13:28 2023 from 172.16.4.184
root@moodle:~#
```

2. Now, change prompt to "Installation Folder"

```
cd /var/www/html/teal_classroom/
```

A terminal window with a title bar containing a window icon, a maximize icon, and a close icon. The terminal text shows the prompt 'root@moodle: /var/www/html/teal_classroom' and the current directory path 'root@moodle: /var/www/html/teal_classroom# |'.

3. Execute the following commands:

Get the code using git by running the following commands in the top level folder of your Moodle install:

- a. `git clone https://github.com/trampgeek/moodle-qtype_coderunner.git question/type/coderunner`
- b. `git clone https://github.com/trampgeek/moodle-qbehaviour_adaptive_adapted_for_code_runner.git question/behaviour/adaptive_adapted_for_coderunner`

Co-funded by the Erasmus+ Programme of the European Union

Note: Just follow onscreen commands while login in moodle LMS (this task should be performed after execution of 3.a and 3.b, you will find coderunner plugin on your local server as shown below: (Site Administration -> Plugin))

Question types

CodeRunner
[Multiple choice](#)

- Once it is successfully installed, you can access **coderunner** in your moodle course as shown below:

Fundamentals of Programming

The screenshot shows the Moodle course navigation menu for 'Fundamentals of Programming'. The menu items are Course, Settings, Participants, Grades, Reports, and More. The 'More' dropdown menu is open, showing options: Question bank (highlighted), Content bank, Course completion, Badges, and Competencies. On the left, the 'General' section is expanded, and 'Topic 1' is collapsed.

- Now, create a **new question** to use “coderunner” in your moodle course

Show question text in the question list
